

1200 ROOF VENT VALVE

Wager's 1200 Odor Control Roof Vent is designed for rooftop ventilation as a means to equalize the pressure required to keep steady flows of wastewater in toilets and sinks. Odor may become a problem when the resulting H₂S gas from a septic system flows to ground levels by means of wind currents or temperature inversions.

Our 1200 model is molded from UV resistant reinforced nylon for protection from harsh environments. A slip-on sleeve allows for easy installation. Vent holes inside the unit provide a 1:1 open area of airflow. Cover vent holes are designed to restrict insects from nesting in the unit.

Each unit contains a canister with 5 lbs. of our odor scrubbing media. A groove lock top makes canister replacement quick and easy. Media and canisters are all non-toxic and landfill disposable.

SPECIFICATIONS

BODY

- REINFORCED NYLON
- SLIP ON SLEEVE
- VENT HOLES PROVIDE 1:1 OPEN AIRFLOW

GASKET

- BUNA GASKET

MEDIA CANISTER

- TRANSPARENT
- HOLDS 5 LBS OF MEDIA
- DISPOSABLE

COVER

- GROOVE LOCK COVER
- COVER VENT HOLES
