

# BOWMONK 2000

Ideal for brake and skid testing, traffic accident investigation/reconstruction and vehicle safety inspections. Vehicle and examiner identification can be included via the touchpad. All results are time date stamped. Easy to use and portable.

- Most technically advanced and versatile instrument for brake testing
- Self-contained and rugged. Stores up to 150 tests with download capability
- Graphic printout for easy interpretation
- Printer produces two-part printout
- Heavy vehicle testing in mines and quarries using vehicle speed and ground slope to determine braking efficiency
